## **Introduction to the HealthIE Chart**

HealthIE Chart provides access to patient health information and an electronic connection among physicians, hospitals, labs, and other health care organizations. Patient encounters, medical images, test results, and care summaries are delivered instantly, accurately, and securely when and where they are needed, instead of waiting for faxes or mail, allowing you to focus on the patient at the point of care.

## **Account Access and Login**

To gain access to HealthIE Chart, a designated member of your organization must complete and submit a user access request form on your behalf. Once completed you, will receive an invitation email from [noreply@okta.com](mailto:noreply@okta.com) to complete your registration process. This email will contain your username along with, instructions for setting up your new password and completing the registration process.

## **End User Training**

Virtual training sessions are available. If interested please send an email to [hiesupport@healthienevada.org](mailto:hiesupport@healthienevada.org) to request a virtual training be scheduled for you and any other users at your facility. If you request virtual training, our Outreach Support Analyst will contact you to coordinate the following training options: (1) Group sessions, (2) Train the Trainer or (3) individual training.

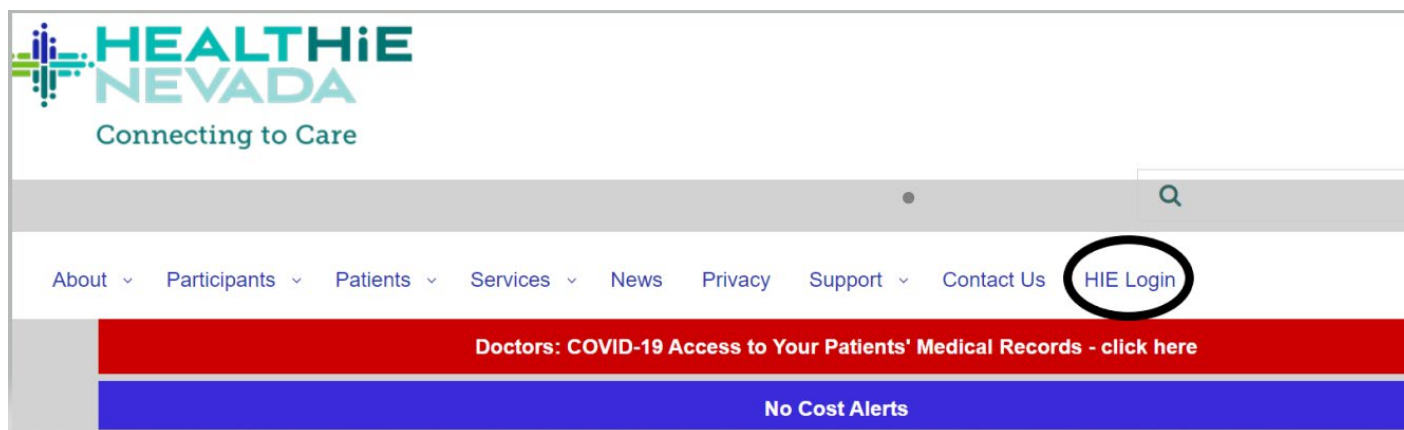

## **Where do I Log in?**

You can Log in to HealthIE Chart two ways.

You can access the direct URL at <https://healthinevada.esante.us/#/login>

Or you can access the HealthIE Nevada website <https://HealthIENevada.org/> and select the HIE login as shown below.

## Click Wrap Agreement

This agreement is displayed the first time you access HealthIE Chart. In order to proceed you must accept the Agreement. If you decline the agreement, you will not be able to proceed to patient search.

**Important**

HealthIE Nevada operates the statewide health information exchange (HIE), which is a repository of patient data for the purpose of care coordination among medical providers. We collect clinical data on all patients being treated in Nevada, and it's vitally important to keep that information secure.

It is your responsibility to ensure the privacy and security of this patient data. We ask that you handle the data carefully, and only when necessary to perform the requirements of your job. Information contained in the HIE is protected health information (PHI) as described in HIPAA regulations, and it must be protected accordingly. You may only access patient data in the HIE when there is a clear need, e.g., for chart preparations. You may not look up records of celebrities, friends, neighbors, family members or yourself unless you are actively treating that person in a professional context. HealthIE Nevada audits all activity for data contained in the HIE.

**By accepting these terms and conditions, you attest that:**

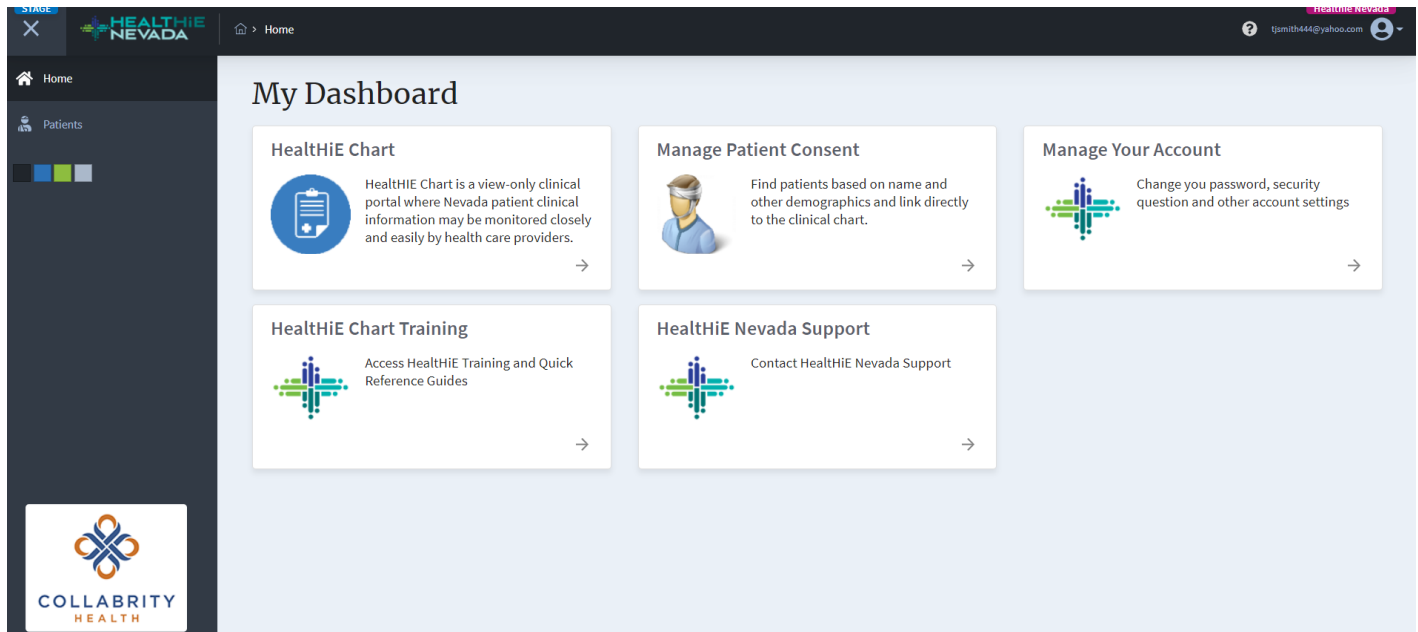

1. You have received training from your health care organization on viewing and sharing protected health information (PHI) in accordance with HIPAA 45 CFR 164
2. You understand that it is your duty to protect patient privacy according to HIPAA through your responsible use of PHI within the HIE. You agree to use HIE data only as needed for patient treatment, payment, operations, care management or population health.

[I accept](#) [Sign Out](#)

## My Dashboard

Once you have logged into the system you will land on the My Dashboard Page. This page provides you multiple tiles. To access, simply click the tile you wish to access, and you will enter that specific module.

1. **HealthIE Chart:** To search patient medical records.
2. **Manage your account:** To change your password, security questions or account settings.
3. **HealthIE Chart Training:** A video tutorial of HealthIE chart.
4. **HealthIE Nevada Support:** information on how to contact HealthIE Nevada Support.

## **Patient Lookup**

The initial page of HealthIE Chart is the Patient Lookup. A patient search must be completed before any other pages can be viewed.

### **Searching for a Patient**

There are two ways to search for a patient.

1. **Patient name.** Enter patient last name. All other fields are optional and are used for narrowing the search results.
  - The first name field can be entered as a wild card search with three or more characters: JON produces Joni, Jonas, and Jonathan as results.
  - The format for the date of birth should be mm/dd/yyyy.
2. **MRN Search.** Enter patient MRN.

**Click SEARCH.**

**Click on the correct patient in the search results to access.**

NAME	GENDER	DATE OF BIRTH...	PHONE	ADDRESS
Ada2 Test	Female	04/23/2018		111 Abc Street
Adaire 2 Test	Female	12/23/1984		888 S Rancho Dr
Adam Test	Male	10/30/1995		123 Happy Street

## Patient Consent

### Yes

If a patient has consented to share their data with the HIE you will be allowed to proceed to select the purpose of use.

### No

If a patient has selected to not share their data, you will see the following message and will not be able to access their records.

This patient selected a negative consent. Access to view the patient information denied

OK

### Emergency Only

If a patient has selected to only share data in Emergency Only situations, you will see the following notification and be required to select a purpose to access the records. You must select Emergency as the purpose of use to proceed.

Patient has consented to allow access to their records only for emergencies.

- ☐ Emergency
- ☐ Payment
- ☐ System Administration
- ☐ Treatment

CANCEL OK

## User Attestation

The user will be asked to attest as to the reason for access or to agree to certain terms. Once the attestation is made you will enter the patient chart.

### Reason for Access

AARON TEST RUN Aug 5, 1923 (97) Male

Please choose reason for access:

- ☐ Emergency
- ☐ Payment
- ☐ System Administration
- ☐ Treatment

CANCEL OK

## Patient Info

The Patient Info page displays the basic patient demographic information on a patient as well as the medical record numbers (MRN) for each facility that patient has been seen at that currently participates with HealthIE Nevada.

## Admits / Discharges / Registrations

The ADT page shows all the admissions, discharges, transfers, and registrations of the patient.

To view the record, click anywhere on the record line.

## All

This display shows all the different record types for a particular patient in one location. The ADT, Transcription, Radiology, Lab records, and CCDs for the patient can be viewed.

### *Filtering Information*

Click the filter icon to display the options.

Deselect one or more of the checked boxes at the top of the screen under the patient information: ADT, Transcription, Radiology, or Lab. The four options are turned on by default.

Apply other filters as desired: keyword search, facility, provider, and date range. Press FILTER.

To view the record, click anywhere on the record line. While still in the record viewing screen, print the record by pressing PRINT or add it to the print list by pressing add to print selections.

## Allergies

The Allergies section is a consolidated list comprised of known allergies received from the encounters of the patients.

<

## CCDs

Continuity of Care Documents are accessible for view. Open each document by clicking on it while you are in the view record mode.

## Encounters

The Encounters section displays patient admission, discharge, and transfer event information from across the HealthIE Nevada network.

## Immunizations

This section will query the Nevada State Immunization Information Registry (Nevada WebIZ) and return results for that patient if there are any.

## Transfer to PACs

Radiologists and other clinicians needing on-demand access to prior imaging studies can query external Picture Archiving and Communications Systems (PACS) to transfer images into local PACS and quickly view the historical patient images. This is an additional service that requires an additional configuration and cost.

## **System Timeout**

If on any page the screen is inactive for 15 minutes, the system times out and returns the user to the login page. A warning appears one minute before the system logs the user out.

## **Toolbar**

Each page that contains patient records comes equipped with a toolbar. The toolbar is used to filter, view, and print records.

If at any point any of the toolbar options are unavailable, the icons appear in gray. The filter icon also turns to an outline instead of solid.

## Filter

Click this button to display and apply filters to the patient records. Filter options vary depending on the page but generally include Search, Facility, Provider, From date, and to date.

Clear the filter by either pressing Clear Filter or by pressing the Refresh button on the toolbar.

Because it is a toggle button, hide the filter options by clicking the button again. If filtering is not available, the icon appears as a gray outline.

## View Records

When in this view, it is possible to click on a record in the result list to view the record.

## Select to Print

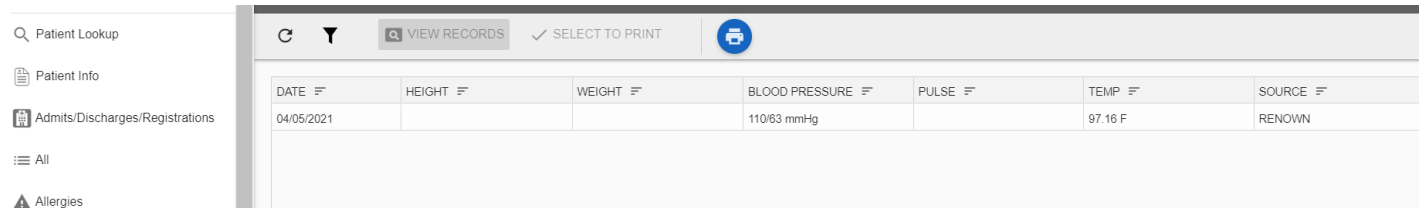

When this view is selected, it allows the user to select multiple records at a time and add them to a print queue. You cannot view records from the select to print view.

## **Vitals**

The Vitals page displays the vital measurements of the patient, such as temperature, weight. When on this page, both view records and select to print are disabled on the toolbar.

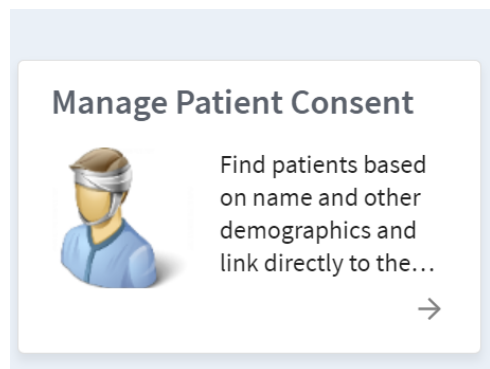

DATE	HEIGHT	WEIGHT	BLOOD PRESSURE	PULSE	TEMP	SOURCE
04/05/2021			110/63 mmHg		97.16 F	RENOWN

## **Managing Consent**

With appropriate permissions, you can update and edit a patient's consent preferences. HealthIE Nevada has set default consent preferences for patients based on Nevada state laws and practice standards. You can access a patient's consent preferences in two ways:

1. Directly from the dashboard in the Manage Patient Consent tile.

2. From the side panel on the dashboard.

Search for a patient name using the Quick Search toggle on the main screen. Quick Search is activated by default, as shown by its green color. Enter the patient first name, last name, or a portion of either name, and then select Enter.

Toggle off the Quick search switch to its gray position, leftmost position. The blue Patient Search button appears. Select the blue Patient Search button to open the Patient Search tray.

Enter the patient's Patient ID, First Name, Last Name, and/or Date of Birth. When enough search criteria populate the fields to run the search, the Search button becomes enabled. Select the Search button at the lower right of the tray to run the search.

Q Patient Search

Patient ID

Patient ID

First Name

First Name

Last Name

Last Name

Date of Birth

Search

Close

The search listing returns. Select the Cancel button to close the Patient Search tray and clear any search criteria entered in the tray.

In order to change a patient's consent status, select from the drop-down menu: consent options include "Opt in" (green), "Opt out" (red), or "Emergency only" (yellow)
