HealthiE Nevada Helps Hospitals Comply  
with COP e-notify rules

**A**s a condition of participation (CoP), the 21st Century Cures Act requires Medicare and Medicaid-participating hospitals that utilize electronic medical records to send electronic hospital and emergency department notifications (alerts) to post-acute care providers of discharged hospital patients, beginning May 1, 2021. Non-compliance may result in termination of payments.

Partnering with HealthiE Nevada will help ensure compliance with these new CMS requirements. Our alert system exceeds the minimum requirements of the CMS CoP by directly notifying your patients' post-acute providers of admissions, discharges, and transfers from your hospital. HealthiE Nevada also notifies post-acute providers of any additional clinical information that may be needed to improve clinical, financial, and satisfaction outcomes of care.

## NOTIFY ADVANTAGES FOR HOSPITALS

- Included as part of your subscription to HealthiE Nevada
- Single alert delivery connection
- No-cost alerts sent to community providers (using direct secure email (DSM))
- Provider registration process management
- Report enhancements for providers who supply patient lists to HealthiE Nevada
- Reduces burden on medical records staff as providers receive discharge summaries and other supplemental information through the HIE
- Monthly CoP compliance reports

Companies who are new to the industry may propose tools that support admission, discharge, and transfer notifications that meet the “reasonable” requirements of the CoP regulations. However, these organizations do not have the 10-year legacy HealthiE Nevada has as being Nevada’s sole health information exchange. Learn more about the State-based relationships we have developed over the years and our network of community providers here <https://healthienvada.org/participants>.

If you are a current hospital participant with HealthiE Nevada, there are no new interfaces for you to implement as a result of new legislation. If you have questions about future impacts, please contact us.

If your hospital does not currently participate with HealthiE
